

PERI VT20 Alpha

Quality you can afford

What makes the VT20 Alpha Girders stand out!

- **Enhanced moisture resistance and durability:**
highest grade particle board is specifically designed for fluctuating humid conditions, providing stable performance without warping or swelling
- **No torsion and dry cracks:**
making the VT20 Alpha a reliable option for use in both dry and humid climates
- **Uniform strength distribution:**
It's consistent density offers more reliable load-bearing performance and stability as the particle board does not contain butt-joints commonly found in 3-ply girders

**NOT JUST YOUR
STANDARD CHIPBOARD IS IT!**
