PERI QuickSolve | Wall Planner

The planning tool for your wall formwork project

PERI QuickSolve is the quick and easy application for planning simple floor plans. You can plan various PERI formwork system solutions for your wall project. Depending on your choice, PERI QuickSolve will create solutions for your project, including 2D and 3D views, as well as a parts list. All you need to do is create a floor plan of your construction project in the App and specify some basic variables of your project. The rest is done by the application. It creates detailed cycle overviews to balance your wall cycles. The formwork solution is either created from your inventory or you simply use the optimal proposal from the application. What's more, the plans can be adapted spontaneously to changing situations on your construction site. The web application is available 24/7 and can be used for planning walls. It is free of charge and browser based, thus, no installation is needed. It runs on computers or tablets alike, thus is a simple to use solution.

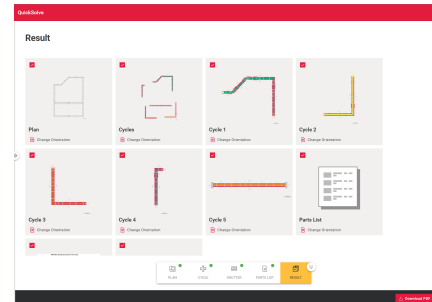

PERI QuickSolve allows you to plan simple floor plans, create material requisitions with or without your inventory and react flexibly to any changes. It is accessible with computers or tablets and browser based, thus you can use it independent of your actual location.

The first step is to create your floor plan, select the formwork system and enter some basic variables of the project.

Detailed cycle overview for balanced cycles and creation of parts lists for material allocation on your project.

PERI QuickSolve results are summarized and can be exported as PDF.

Start to QuickSolve your project:

PERI QuickSolve planning modules are powerful and effective tools enabling you to work faster and thus to be more efficient on your project. With PERI QuickSolve, you have a useful tool at your disposal that makes your life easier.

PERI Quicksolve helps you to simplify your project:

- It is easy to use, planning is very intuitive
- It takes into account your needs and the material of your choice
