The best material

in the right quantity, at the right time, in the right place

The PERI Rental Service MS Plus is the service package with cleaning and repair services for PERI system formwork at clearly calculable prices.

Through the renting of material, not only are peak requirements cost-effectively covered. Also for out-of-the-ordinary applications, renting the appropriate system equipment is the most suitable option. PERI has more than 110 logistics locations worldwide, and reliably delivers to the respective construction site.

PERI thus reduces the capacity utilization risk for the customer. The rental price includes the rental service MS which means maintenance of normal wear and tear caused by proper usage. Thus PERI ensures consistent quality of formwork and scaffolding systems.

- Environmentally-friendly, mechanical cleaning of elements and accessories
- Repairs due to wear and tear, dirt and damage
- Formlining repair with plates $d = 60 \text{ mm}$ or $d = 40 \text{ mm}$
- Required repair work, e.g. on the frame and struts that does not require removal of the formlining
- Alignment of connecting parts and accessories
- Flattening of dents in circular steel props
