

## MULTIFLEX Girder Slab Formwork

Flexible. Efficient. Impressive results.

### Optimized use of materials

through any combination of GT 24 and VT 20K Formwork Girders as well as a freely selectable girder arrangement

### For all ground plans

through the variable positioning of the girders – also polygonally, trapezoidal or overlapping

### For all surface requirements

easily adaptable with freely selectable formlining according to the required quality of the slab underside
