# PERI Consumables

## Small Parts, Big Impact

Our plastic consumables may be standard but the service behind them is not.

Even the smallest site components affect concrete quality. That is why PERI offers cones, plugs, fillets, tubes, and spacers as part of a broader, fully supported solution. From planning to pour day, these components are available quickly, in the right sizes, and backed by expert technical support.

By sourcing your consumables from PERI, you benefit from:

- Integrated support from the same team handling your formwork and engineering needs
- Fast response times and dependable stock availability
- Accurate recommendations tied to your PERI system setup
- Consolidated procurement for greater efficiency and fewer supplier headaches
- Site-ready delivery and ongoing technical assistance

Whether you're collecting a few cones or coordinating an entire formwork solution, PERI ensures consistency, simplicity, and peace of mind.
